I'm an enthusiastic web developer located in India, driven by a keen appreciation for captivating design. My true passion lies in crafting user-friendly websites that not only leave a lasting impact but also function seamlessly. I excel at optimizing with data structures, and my commitment to continuous learning fuels my constant pursuit of innovation.

Work Experience

Web Development Intern

10/2023 to Present
Itzfizz Digital
Bangalore

In my current role as a Web Development Intern, I collaborate closely with the design team and work on various web development projects for both Itzfizz and its clients. My responsibilities encompass coding, optimizing website performance, and executing web-related tasks to improve our online presence.

Projects

PerceptivePages

https://mernblog-agam.vercel.app/

Developed a fully authenticated blogging application utilizing ReactJS for the frontend, Node.js for the backend, and MongoDB as the database, allowing users to access, create, and edit blog posts.

Open-AI Article Summarizer

https://agam-summarizer.vercel.app/

Created a ReactJS application that seamlessly leverages OpenAI and Rapid API to efficiently summarize articles and webpages.

ShowsDB

https://showsdb.vercel.app/

Crafted a stunning and responsive ReactJS application enabling users to search for and retrieve information on any TV show. Gained valuable experience in data retrieval from public APIs through this project.

ShareBoard Online Clipboard

https://shareboard.vercel.app/

Developed a full-stack MERN (MongoDB, Express, React, Node.js) application for effortless content sharing and synchronization across the internet.

Skills

React.js
